KNOWLEDGE BASE

Knowledge publishing

Overview

Keep team knowledge easy to find, easy to maintain, and ready to share as a focused PDF book.

Publishing workflow

> Choose the documents your reader needs. Export order controls the order of chapters in the book.

Roles and responsibilities

Role	Responsibility
Reader	Follow links and browse rendered documentation.
Editor	Maintain Markdown, diagrams, and page images.
Authorized exporter	Select approved documents and create a PDF book.
Administrator	Choose exporters and customize the book cover.

Continue with the release runbook.

KNOWLEDGE BASE

Release runbook

Before you publish

1. Review the selected documents and their linked references.
2. Check screenshots and Mermaid diagrams in the document preview.
3. Select documents individually and put them in reading order.
4. Give the PDF book a useful title.

Markdown example

```
## Deployment checklist

- Confirm the build
- Review release notes
- Publish the runbook

[Publishing guide](wiki:page-id)
```

Export checklist

The book contains the saved cover, linked contents, and only the chosen documents. Every physical page is numbered and available through the PDF bookmarks sidebar.

Check	Expected result
Contents links	Jump to the matching document and heading.
Page numbers	Match the physical PDF pages, including cover and contents.
Export access	Granted to an individual account by an administrator.

Return to the publishing workflow.
